

Comfort and Care

Support when it matters most

It is often said that wisdom and experience come with age. However, for some, these valuable qualities are accompanied by cognitive challenges or a decline in physical autonomy.

When daily support becomes necessary, our accommodations offer residents:

- A safe environment designed to enhance quality of life, comfort, and overall well-being.
- Personalized care, tailored to each individual's needs, provided by skilled and compassionate healthcare staff.
- A customized recreational program to enrich their daily experience.

Peace of mind

There is always staff available on-site for residents in our dedicated care accommodations, day and night, seven days a week. We foster a warm and welcoming environment where family members are actively involved, forming a team focused on the well-being of the resident. Family and friends are always welcome.

- Qualified staff are present at all times to meet the residents' needs and communicate with their loved ones when necessary.
- Accessibility for individuals with reduced mobility, emergency response systems and more.

Where applicable our Memory Care accommodations feature a secure environment specifically designed for individuals with cognitive impairments.
